

STANDARD VS. ADVANCED PROTECTION

In today's evolving data threat landscape, safeguarding your business requires the right tools. Two leading solutions stand out:

CodeBlue's Standard Antivirus Protection
 and
 CodeBlue's Advanced Threat Protection.

We've highlighted the main features of both platforms for your consideration in choosing the best fit for your organization.

MAIN FEATURE COMPARISON

	 ADVANCED	 STANDARD
Malware Detection	✓	✓
Virus Detection	✓	✓
Virus Quarantine	✓	✓
Real-Time Threat Protection	✓	✓
Perpetual Updates to Virus Definitions	✓	✓
Ransomware Protection with Roll-Back	✓	✗
Local Content Filtering for Web Traffic	✓	✗
Built-in Firewall for apps and data	✓	✗
Proactive Threat Hunting	✓	✗

Your data protection should align with your security needs. CodeBlue is here to help assess and advocate for the best solution for your business. If you are interested in upgrading or evaluating the benefits, please reach out or visit us online at the link below.
